DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, 4-9, 11-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over CA 910844.

CA 910844 discloses electrolytic processing for the recovery of copper, wherein the cathode blank 10 has a bottom edge 16 is provided with an inverted V-shaped groove 18 leading substantially to the cathode blank faces. See page 6, line 25 – page 7, line 2. The V-groove 18 at the bottom edge of the cathode blank 10 causes the copper to deposit at this edge in the form of dendrites which develop in directions normal to the sides of the groove. The plane at which these dendrites meet in their growth is a plane of weakness at which the deposit can readily be broken. See page 7, lines 12-17. The plane of weakness in the bottom edge deposit eliminates any serious interference with the stripping operation. See page 8, lines 26-27.

The subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the instant invention was made because even though the prior art of CA 910844 does not specifically disclose the angle of the V-groove, the patent does disclose that the copper material when separated from the cathode plate, separates easily due to the plane of weakness in the bottom edge of the cathode plate.

One having ordinary skill in the art would have the ability to perform routine experimentation in order to optimize this plane of weakness and further, the figure no. 3 of the CA patent shows the v-groove used in the bottom of the plate and it appears to be in the range as set forth in applicant's instant claims. Therefore, the prior art of CA 910844 renders the applicant's instant invention obvious for the reasons set forth above.

Conclusion

3. Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on March 13, 2006, prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609.04(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
